Category: 2010 Events

Additional Information:

Tools and Strategies for Commercial End Users to Effectively Manage Energy and Costs

Rising energy costs, stricter environmental regulations and the constant challenge to increase the bottom line mean that businesses need to ensure they operate in a much more cost-effective manner. Implementing energy efficient measures in your company can lead to significant cost savings.

This comprehensive event has been designed to offer essential information needed to conduct energy efficient practices more strategically. The conference will also provide first-hand expertise from specialists who have implemented energy efficient practices in their organizations and have seen major improvements in their bottom line.

Attend this two-day interactive conference to get solutions to your energy efficiency challenges:

- Hear case studies from companies including, Husky Injection Molding Systems Ltd, St. Marys Cement Inc. and Lange Transportation and Storage Limited on their energy efficient practices
- Understand how to gain buy-in from management for energy-efficient initiatives and the importance of justifying the importance of these projects
- Learn how to conduct a cost-benefit analysis of energy efficient technologies for enhanced economic and technical excellence
- Hear from Natural Resources Canada and BOMA Toronto on financial incentives for energy efficient projects

And much more!
