

ARC Advisory Group's World Industry Forum

Mon, Feb 08 - Thu, Feb 11

Place: Orlando, Fla.

Web Site: <http://www.arcweb.com/res/forumorl>

Category: 2010 Events

Additional Information:

Achieving excellence in every aspect of business operations is critical for success. Excellence cannot be achieved in isolation; it requires perfect execution, flexibility, and collaboration among corporate leaders from all organizations including business, IT, engineering, operations and maintenance.

ARC Advisory Group's World Industry Forum: Where Industry Leaders Meet to Solve Their Most Challenging Issues provides an environment for industry executives to collaborate on solving their most challenging issues. ARC is co-locating its three annual forums together at this event: its Operations-focused Forum (held in Orlando for the past 13 years), Asset Lifecycle Management Forum (held in Houston last year) and Supply Chain & Logistics Forum (held in Boston for many years). In addition, we will present a program focused on Cyber Security.
