### *Additional Information:*

The Canadian Institute brings back its Plant Maintenance & Asset Reliability conference, providing delegates the latest information on best practices, tools and technologies to improve the reliability and overall effectiveness of plant equipment.

Delegates will hear from industry leaders and specialists, including: Alta Steel Metegrity Inc., ArcelorMittal Hamilton, Shell Scotford Manufacturing, Fluor Global Services, The Fluid Life Corp., GPAllied, Vesta Partners LLC, and Matrikon Inc.

Conference topics include:

- Developing a proactive maintenance culture
- Troubleshooting equipment problems using simple tools and techniques
- Integrating CMMS and project management tools for enhanced plant efficiency
- Improving plant performance through effective lubrication practices
- Using &quot;lessons learned&quot; to help your company optimize asset reliability.
