

Hydraulic Power Press Safety seminar

Thu, Mar 25

Place: Burlington, Ont.
Times: from 08:45 to 03:00
Web Site: http://www.boschrexroth.ca/country_units/america/canada/en/training_and_seminars/seminar_series/hydraulic_power_press_safety/index.jsp
Category: 2010 Events

Additional Information:

Improve your understanding of the basic hydraulic power press safety regulatory requirements, Canadian and European Community standards, and how Bosch Rexroth Hydraulics are engineered for compliance with these requirements.

Who should attend

All manufacturing and engineering personnel concerned with hydraulics press operations, safety regulations and compliance: Plant-level managers, maintenance managers and supervisors, safety training and compliance officers, production and process engineers. OEMs and hydraulics press design engineers and PSR compliance consultants will also benefit.

How it can help you

Attendees will achieve a detailed understanding of how Canadian and European Community hydraulic press safety regulations and standards have been developed, and how relevant Bosch Rexroth hydraulics technology has been engineered to comply with the regulations. It is the most comprehensive seminar available that covers both regulations and component-level safety application in one session, along with recommended maintenance practices for maintaining compliance and worker safety.

Cost: Free
