

Safe Motion – Drives with Integrated Safety Functions seminar

Tue, Mar 30

Place: Burlington, Ont.
Times: from 09:00 to 02:00
Web Site: http://www.boschrexroth.ca/country_units/america/canada/en/training_and_seminars/seminar_series/safe_motion/index.jsp
Category: 2010 Events

Additional Information:

Improve your understanding of machine safety, key federal and provincial regulations, and the latest machine safety technology. Learn how drive-based Safe Motion can help you increase worker safety and productivity at the same time.

Who should attend

All manufacturing and engineering personnel concerned with safety: Plant-level managers, maintenance managers and supervisors, safety training and compliance officers, production and process engineers, OEMs and machine design personnel.

How it can help you

Attendees will have a more complete understanding of key CSA and provincial regulations governing machine safety practices and machine safety design concepts. They will gain hands-on understanding of how drive-based Safe Motion can help manufacturers satisfy these regulatory requirements, maintain efficient and profitable production, and most importantly, improve worker and workplace safety through Safety On Board.
